These address labels should be used to ensure proper routing of post-allowance correspondence. This directive supersedes the "Special Boxes for Patent Mail" instruction. Any Notice of Allowance and Issue Fee Due received without the accompanying address labels should continue to be addressed to Box Issue Fee.

Deputy Assistant Commissioner for Trademarks

Any Application Filed With Instructions to Cancel All of the Claims in the Application is Not Entitled to a Filing Date

In view of the Federal Circuit decision in *Baxter Int'l. Inc. v. McGaw Inc.*, 149 F.3d 1321, 47 USPQ2d 1225 (Fed. Cir. 1998), decided June 30, 1998, the PTO is revising its treatment of applications deposited with instructions contained in preliminary amendments or transmittal letters to cancel all of the claims in the application.

MPEP §§ 711.01 and 714.19 currently indicate that an amendment canceling all of the claims and presenting no new or substitute claims is ordinarily denied entry. The MPEP does not, however, differentiate between amendments submitted with the filing of an application and all other amendments. *Baxter* involved a patent granted on an application filed as a divisional application under former 37 C.F.R. § 1.60 with instructions to cancel all of the claims in the specification without presenting any new claims. The PTO accorded the application a filing date (as of the date of receipt of the copy of the specification and drawings) and sent applicant a notice that the instructions were improper because they would leave the application without claims for examination. In response to the notice, applicant subsequently filed an amendment adding replacement claims.

The court held that the (divisional) application was **not** entitled to the original filing date because the requirements of 35 U.S.C. § 112, second paragraph, had not been met, i.e., the application was effectively filed without a claim. The court concluded that the earliest filing date that could be accorded was the date a claim was filed (which was the date the amendment was filed in response to the notice from the PTO). The court also stated that the lack of a claim was a statutory defect which the PTO could not waive.

As a result of *Baxter*, the PTO will **no longer** accord a filing date to any application (original, continuation, divisional or continuation-in-part) submitted under 37 C.F.R. § 1.53(b) or Continued Prosecution Application (CPA) (continuation or divisional) submitted under 37 C.F.R. § 1.53(d) where the application is accompanied by a preliminary amendment which cancels all claims and fails to simultaneously submit any new claims. MPEP §§ 711.01 and 714.19 will be revised to state that an amendment filed **after** the filing date of an application which cancels all of the claims and presents no substitute claim or claims is ordinarily denied entry. In addition, MPEP § 601.01 (e) will be revised to call attention to *Baxter*.

When filing an application under 37 C.F.R. § 1.53(b) or CPA request under 37 C.F.R. § 1.53(d), applicants and practitioners are reminded to carefully review the application papers, including any preliminary amendments **to be filed with the application**, to ensure that the application will contain at least one claim after the preliminary amendments are entered.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information from the U.S. Patent and Trademark Office. Many PTDLs have on file patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs receive both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office* and numerical sets of patents in a variety of formats. Patent and trademark search systems in the Cassis CD-ROM series are available at all PTDLs to increase access to that information. It is through the CD-ROM systems and other depository materials that preliminary patent and trademark searches may be conducted through the numerically arranged collections.

Each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials.

All information is available for use by the public free of charge. However, there may be charges associated with the use of on-line systems, photocopying and related services.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

Partnership PTDLs provide enhanced and expanded services for which fees are charged. They offer on-line patent text and image searching, on-line trademark searching, and videoconferencing for examiner interviews and workshops. They accept disclosure documents on site, order file wrappers, assignment documents and certified copies for their customers, and host a variety of seminars aimed at specific audiences, including practitioners, paralegals, and independent inventors. Currently, partnerships are located at the Great Lakes Patent and Trademark Center (GLPTC) at the Detroit Public Library in Detroit, Michigan and the Sunnyvale Center for Innovation, Invention and Ideas (SCI³) in Sunnyvale, California.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
